

New Technology Showcase

Tuesday 19th February 2008 University of Warwick

This important event will bring together many senior industrialists from the Automotive, Marine, Aerospace and Construction sectors, and provide an appreciation of the new technologies and tools developed by the PARD programme.

Since 2003, the PARD programme has delivered over £32M of bottom-line value across 500 companies within the automotive industry, and is on track to reach £100M by 2010.

WMG at The University of Warwick now invites you to share in this knowledge and jointly explore how your business, or industrial sector, can utilise our new technologies and tools for similar gains!

Proposed Agenda

- 09:00 – 09:30 Registration & Opening Speaker
- 09:15 – 10:30 Overview Presentations of New Technology
- 10:45 – 11:30 Partner Company Experiences
- 11:30 – 12:30 Buffet Lunch
- 12:30 – 14:30 Practical Demonstrations

The event is free, although pre-registration is required. Please contact:

Hybrid Powertrains

- Economics of Operations
- Configuration
- Legislation

Supply Chain Management

- Large Scale RFID Automotive Applications

Steel Structures

- Advanced Tensile Testing & Knowledge Management

Environmental

- Material VOC Emissions & Your Business

Steel Stampings

- Formability Analysis

Dimensional Analysis

- Predicting Variation Post Processing

Paint Application

- Efficiencies Through Computer Simulation

Preparing Your Organisation

- Making Technology Transfer Happen
- Low Cost BPR Tools

Electronics

- System Integration, Modelling & Testing

Aluminium

- Forming, Joining & Simulation Tools
